AB The colored concrete products are manufd. by alkali treatment of the surface before or after formation of colored coatings contg. metal nitrates, metal chlorides, metal acetates, metal sulfamates, ammonium metal sulfates, and/or their reaction products. Alternatively, the colored concrete products are manufd. by treatment of the surface with

aq. alkali before or after formation of colored coatings, which are manufd.

by impregnating or applying with aq. solns. contg. nitrates, chlorides, acetates, sulfamates, or ammonium sulfates of group IB, VIB, VIIB, and/or VIII metals. The aq. alkali may have pH .gtoreq.8.
